DETAILED ACTION

1. Applicant's amendment and response filed 9/2/03 is acknowledged and has been entered.
2. In view of Applicant's newly filed claims 41-92 in the said amendment, the following restriction requirement is set forth.
3. This application contains claims directed to the following patentably distinct species of the claimed Invention: wherein the isolated peptide comprising the oligopeptide is
 - A) 9 amino acid residues in length
 - B) 10 amino acid residues in length, or
 - C) 11 amino acid residues in length

These species are distinct because their structures are different.

4. This application contains claims directed to the following patentably distinct species of the claimed Invention: wherein the isolated peptide is fused or linked to:
 - A) a T helper peptide
 - B) a carrier, or
 - C) a lipid
 - D) one or more of the same isolated peptide sequences, i.e., a homopolymer
 - E) one or more different peptides, i.e., a heteropolymer
 - E) fused or not fused to a spacer or linker amino acid residues

These species are distinct because their structures are different.

If "A) a T helper peptide is elected, Applicant is further required to elect a specific T helper peptides, such as for example, a universal T helper epitope which comprises aKFVWANTLKAAa (SEQ ID NO: 4266, wherein X is phenylalanine).

5. This application contains claims directed to the following patentably distinct species of the claimed Invention: wherein the composition comprising the isolated peptide further comprises:
 - A) a carrier
 - B) a liposome
 - C) one or more different peptides

These species are distinct because their structures are different.

If "C) one or more different peptides is elected, Applicant is further required to elect a specific composition wherein either: A) the one or more different peptides are separate or B) the one or more different peptides form a fusion protein.

6. Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim is (claims are) generic.

7. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

10. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
